

Instalar NodeJS

npm install -g create-react-app

Criar Projeto

create-react-app gufos-ui

create-react-app is a global command-line utility that you use to create new projects.

Executar Projeto

cd gufos-ui

npm start

```
Administrator: C:\Windows\System32\cmd.exe
- react-app-polyfill@1.0.1
- react-dev-utils@9.0.1
- react-dom@16.8.6
- react-error-overlay@5.1.6
- react-scripts@3.0.1
- react@16.8.6
- worker-rpc@0.1.1
Done in 181.44s.

Success! Created gufos-ui at C:\_github_s\senai-dev-2s2019\sprint-3-frontend\react\gufos-u
i
Inside that directory, you can run several commands:

  yarn start
    Starts the development server.

  yarn build
    Bundles the app into static files for production.

  yarn test
    Starts the test runner.

  yarn eject
    Removes this tool and copies build dependencies, configuration files
    and scripts into the app directory. If you do this, you can't go back!

We suggest that you begin by typing:

  cd gufos-ui
  yarn start

Happy hacking!

C:\_github_s\senai-dev-2s2019\sprint-3-frontend\react>
```

localhost:3000

```
npm
Compiled successfully!

You can now view gufos-ui in the browser.

  Local:            http://localhost:3000/
  On Your Network:  http://192.168.56.1:3000/

Note that the development build is not optimized.
To create a production build, use yarn build.
```
